Mr. Terry Carguello  
Loctite Corporation North America  
429 Hillcrest Road  
York, PA 17403

20 March 01

Dear Mr. Carguello:

Pursuant to your request for confirmation that GKN Sinter Metals - Emporium is using the Loctite Resinol RTC, I found that our records show that the Resinol RTC has been used since April 1992. Prior to that time, the resin used was Loctite PMS -10E, another anaerobic resin.

The Resinol has performed as expected in the sealing applications for which it has been used. The curing is consistent and the cleaning of surface resin is trouble free, an improvement over the old PMS-10E.

You may reference this letter in regard to discussions in which other GKN operations may have interest in current use within the GKN organization.

Sincerely,

Kevin R. Couchman  
Director of Technology  
GKN Sinter Metals  
Industrial Products Group
